DEATH WAS WITH THE DIVER

JAMES W. WOODS MAKES HIS LAST DE-SCENT INTO THE SEA.

A Fatal Visit to the Sunken Steamer Iberia Air-Pipes Got Entangled, or Air-Pumps Were Not Properly Handled, and the Diver Died at His Work-He Had Been in the Profession Since Boyhood.

Wrapped in his uncouth diver's garb, with its pipes like the arms of an octopus, James . Woods stepped over the side of the wrecking steamer Tuckahoe, yesterday, and went down into the sea.

The Tuckahoe was three miles off the Fire Island shore, to the southeast. That is the point where the French steamer Iberia sank carly in November, after the big, cleanprowed Umbria had cut her in twain, and the wrecking crew was working about the lost ship.

Woods was an experienced diver. In boy hood he had made his first descent into the ocean depths. He had no feeling of appre-hension. He had lost that sense of the ro-mantic about his profession which novices always feel, and with which the outsider

always feel, and with which the outsider never parts.

He had been daily visiting the sunken Iberia. When he descended this time he went into the forward hatch of the wrecked vessel, where he had worked before.

Another workman came in with him, but Woods did not know it. The other workman was Death, and when his errand was accomplished the diver, too, was through with his work.

signal for assistance, not long after Woods went down, caused the sending of another man to investigate the diver's trouble.

What this man found made him signal to be what this man found made him signal to be pulled up in a hurry, and then the cumbersome spparatus which held the first diver was elso and quickly drawn to the Tackahoe's deck. It contained the dead body of Woods. The people of the Merritt Wrecking Company, for whom the dead man had worked about a year, do not like to talk of the accident

One story says that in the case of Woods these pipes got twisted so that the air was cut off and the man was suffocated.

Another theory is that the housting lines and air pipes became entangled, that a slit was cut in an air pipe and that water came in

was cut in an air pipe and that water came in so that the man was drowned.

The most serious version of the affair contains the allegation that the air-pumps were not properly attended to by the men on the Tuckahoe.

At all events, the diver's life went out down here in the sunken ship, where he had gone Woods was forty-eight years old and was a Woods was forty-eight years old and was a Californian.

After vain attempts to restore life his body was taken on the Tuckahoe to Stapleton, S. I. and the case was reported to Coroner Gorman.

and to-day he is as well as a man could be after such au experience.

Wolter was working at the bottom of a damaged lumber vessel, in the Schuylkill River, when he felt that his supply of air was shut off.

He at once gave the signal to be pulled up, but owing to the extreme weight of his diving apparatus and the fact that the lines became entangled, he slipped back into the river twice before he was finally landed on deck.

His face was black and terribly swollen,

and it was not expected when he was first brought to the surface that he would recover.

Lawyer Mapes knew nothing beyond the fact that he was instructed to dispossess.
Lawyer Delos McCurdy, who was Col. Tilden's counsel in the recent will contest, said this morning that he had seen Col. Tilden last night, but that he (Col. Tilden) had not mentioned anything of any trouble. "I know," said Mr. McCurdy, "that Col. Tilden has been talking for six months past about abolishing his New York store, and I also know that he has had a great deal of family trouble, in the way of sickness and death, lately. John Crough, the ex-Brooklyn fireman attached to Engine Company No. 1, who is accused of criminal assaults on eleven-yearold Annie Roxey and other little girls, was arraigned before Justice Massey and a jury this morning.

The first witness called was Mrs. Sadie Roxey, of 668 Baltic street, mother of one of the children. She said that little Annie came home one evening in September and told her that she and eleven other little ones had been enticed into the engine-house at Fourth avenue and Nineteenth street and that young Crough had ill-treated them. She had her child examined by doctors, and

She had her child examined by doctors, and their report made her believe the story.

ON THE YANTIC. FIRE IN A FURNISHED ROOM. T

Yellow Fever Starts One of Our War Ships for Home.

Naval Circles Stirred Up Over a Despatch from Admiral Luce.

Galena, After Coaling, Returns to Port-au. Prince.

WASHINGTON, D. C., Jan. 4. - A sensation has been caused in naval circles by the receipt of a despatch at the Navy Department from Rear Admiral Luce stating that yellow fever had broken out on the Yantic and that she had left Jamaica for New York on that account.

The despatch did not state whether any of the officers had been taken with the fever. and in the absence of such information it is believed that none of them are down with it. Admiral Luce also stated that the Galena, after coaling at Jamaica, would go back to Port-an-Prince to look after matters there, and that the Haytan Republic remained there awaiting a crew to take her northward.

The development of the fever on board the Yantic so soon after her arrival in Haytan waters and following the experience of the Boston, indicates that any Northern yessel waters and following the experience of the Boston, indicates that any Northern vessel going to that port is likely to be similarly affected. It is very unpleasant news for navat officers, as some of our ships are likely to be needed there for some time to come. It is expected that the United States steamer Ossipee, now at Norfolk, will sail for Port-au-Prince, Hayti, in a few days. This is in accordance with orders issued to her commander by Rear-Admiral Luce, commanding the North Atlantic Squadron, prior to his departure on the Galena for Hayti.

Blind Man Occupied the Room and Was Painfully Injured-He Was an Eccentric Fellow and Insisted on Brashing His Hair Refore a Mirror - Perhaps His Matches Started the Blaze. A very exciting fire broke out early this

morning on the top floor of the four-story lodging-house, 40 City Hall place, and one man was taken from the building seriously burned and partially suffocated. The building is a rickety old structure.

The ground floor is occupied as a liquor saloon, and the upper floors are rented out by the week. The room adjoining the stairway on the top floor was occupied by Walter S. Woodbury. the blind seller of brushes and coat-springs,

a familiar figure in uptown streets. He was about fifty-five years old and was quite eccentric in his actions. On Monday Woodbury left the house and told Saloon-keeper Connolly that he intended going to Yonkers to visit his sisters and some

friends. He returned at about 11.30 o'clock last night and entered the saloon boisterous but

good natured and quite drunk. At 1,30 o'clock Connolly carried the blind ously dirty piece of territory on the face man upstairs and put him to bed. About an hour later Patrick Timmons, a lodger in the next room, was awakened by

Woodbury's groans and a strong odor of fire. He arose and going out into the hallway saw smoke coming through the cracks in Woodbury's door. He ran downstairs and aroused Connolly and the two made haste to he biazing apariment. In the mean time the other lodgers in the house had been alarmed, and they rushed back and forth through the hallway very

much excited.
Councily and Timmons burst open the door of the blind man's room, but could only open it about a foot, as Woodbury had moved his Connelly squeezed in and felt around for the mun, but he could not be found. Then an alarm was turned in, and every-

who was not panic-stricken set out to water was carried in kettles from the second floor, there being no water connections above, and thrown in on the bed.

Then the firemen came, and after turning a stream on the place for a few minutes, they entered and searched for Woodbury, finding oim at last lying unconscious under the bed. When taken out of the room he was found to be seriously barned about the arms and ands, and from one hand the skin had been hands, and from one hand the sain had burned for a space of two inches.

An ambulance from Chambers Street Hospital removed him to Bellevae.

Mr. Connolly, in speaking of Woodbury this morning, said: 'He came here about six months ago, and took the room on the top floor. He was always very precise. He had

loor. He was always very precise. He had verything arranged in regular order in his com, and could lay his hands on anything you asked him for.

"When he came here there was a lamp and a looking-glass on the bureau. My wife thought that as he was blind he could dispense with these articles, and removed them. That night he came downstairs and raised a row.

night he came downstairs and raised a row. He said that he paid for a room, and he wanted it furnished or he would leave. He wanted that looking glass and the lamp put back, and in a big hurry, too.

"To humor him we let him have the mirror, but refused to give him the lamp. It is said that he would stand in front of the mirror and brush his hair just as if he had his consider."

The blind man carried matches and was foul of smoking, and it is thought the sparks from his eigar set fire to the be-clothes. The damage to property is slight.

Dan Dougherty Says Pennsylvania Is:

"Most Contemptibly Corrupt," " Most Diabolically Vile," " Most Notoriously Dirty," IN A POLITICAL WAY.

And Yet It Is His Own Native State!

[SPECIAL TO THE EVENING WORLD.] PITTSBURG, Pa., Jan. 4.—Daniel Dougherty. the silver-tongued orator, has broken out in an interview here, in which he says " the State of Pennsylvania is, politically, the most contemptibly corrupt, the most diabolically vile, and the most notori-

of the earth." " It is my native State," said Mr. Dougherty, " but I lament that the grand old Commonwealth has gotten so low. The people have allowed moral abortions in the guise of men to lead them in their politics, and the natural result followed. Pennsylvania's natural resources have been turned over to these knaves and have been used by them for the vilest of purposes.

"Not only has Pennsylvania herself felt the effects of this corrupt use of her wealth, but the entire Union has materially suffered. Money has been sent from the Keystone State all over the Union to poison the polities of the people and thwart the will of the majority. An empire of industry has been turned into a domain for the most selfish set of politicians that reign anywhere in the

He wanted to go to the Sciate, but no Jero Black was too good a man to represent Pennsylvania in the Senate. He would have been a recognized factor in making good laws, but the Keystone State apparently does not want good laws either at home or in sister States. I am not a politician though and am very willing that I should not be classed as one. Mr. Buchanan used to say: 'Dan Dougherty makes lots of noise during a campaign, but after that he subsides.'

"I know a few things about politics, however, and I believe Blaine will be Secretary of State."

Catharine couldn't shut up. Her jaw was locked, and apparently the lock would have to be picked before she could get her lips back into a good every-day close expression. It was a dreadful thought to Catharine that perhaps she would have to go through life with her mouth distended like that.
